

**CPTS**  
cone penetration testing services

## Offering one level of service

### ....the best.

**CPTS is trusted by consulting engineers to provide faster high-quality, reliable CPT data every time.**

Since 1999, CPTS has built a first-class reputation for expertise and experience in CPT services. Owner and exclusive site supervisor, Yvo Keulemans has more than 20 years hands-on CPT experience.

CPTS provides highly experienced CPT operators and a fleet of CPT testing vehicles. Our specialised insitu testing equipment includes:

- ✓ Standard cone ( $Q_c$  &  $F_s$ ) and Piezocone ( $Q_c$ ,  $F_s$  & Pore pressure)
- ✓ Vane shear testing with electronic inline torque sensor
- ✓ Dilatometer and Seismic dilatometer
- ✓ Electronic hand-held penetrometer
- ✓ Wireline soil samplers for sampling soft/loose strata
- ✓ Precision in-house systems to confirm highest accuracy calibration of CPT probes
- ✓ Vacuum chambers capable of completely saturating fully assembled piezocones prior to each test.

**For site access without delay, data without query, and testing efficiency without rival; trust CPTS to deliver the best.**

## Offering one level of service

### ....the best.

**When projects need to be delivered on time and on budget, time is limited and reliable data is critical.**

We help clients solve unique soil testing and site access challenges, by working with **ATV** to transport personnel, sensitive equipment and machinery across difficult-to-access sites.

We can access and test in:

- ✓ Reclamation sites
- ✓ Tidal mud flats
- ✓ Tailings dams
- ✓ Over water testing
- ✓ Dam walls
- ✓ Pre and post sand densification
- ✓ Slip failures
- ✓ Swamps
- ✓ Construction sites.

We are committed to ensuring satisfaction for both you and your client. We achieve this by delivering a top-quality service and keep you informed throughout the engagement and delivery process.

**For site access without delay, data without query, and testing efficiency without rival; trust CPTS to deliver the best.**
