Hoverbarge and Argo

Amphirol

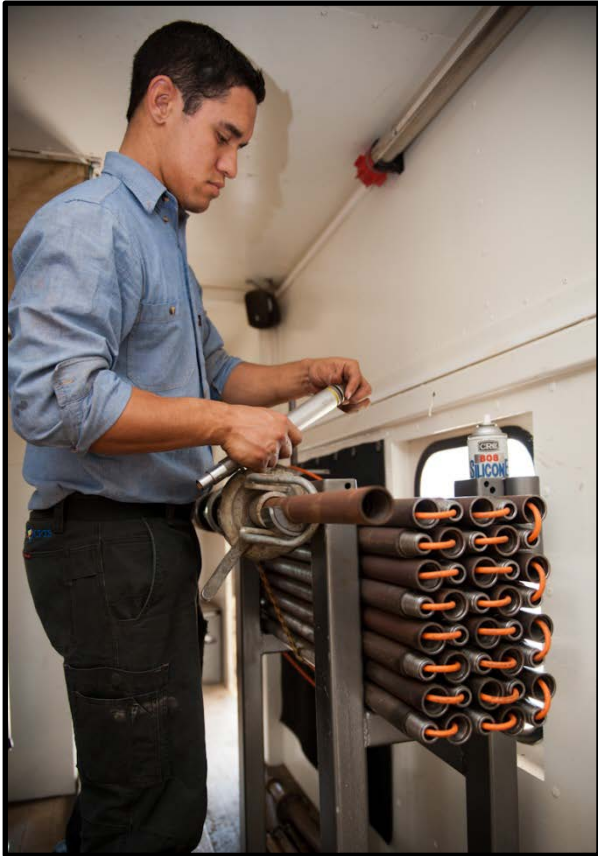

Centaur

We use a full suite of state-of-the art testing equipment including:

- Standard cone (Qc & Fs) and Piezocone (QC, Fs & Pore pressure)
- Vane shear testing with electronic inline torque sensor
- Dilatometer and Seismic dilatometer
- Electronic hand-held penetrometer

Our state-of-the art testing equipment also includes:

- Wireline soil samplers for sampling soft/loose strata.
- Precision in-house systems to confirm highest accuracy calibration of CPT probes.
- Vacuum chambers capable of completely saturating fully assembled piezocones prior to each test.

We pride ourselves on providing
a professional and efficient service,
every time.
